Dear Dr. Rogers —

If you haven't seen the videotape of Bill Cooper's first ~~Sedona~~ Sedona lecture, the one I co-produced, it might be useful in sorting things out.

In it he spoke of William Greer as being alive and said he hoped ~~the~~ Greer would be man enough to stand up and take responsibility for his actions. Several months later I learned that Greer took an early medical retirement from the Secret Service because of an ulcer problem and that he had died in the mid 1970s because of the ulcer problem. I learned that Kellerman also had passed on. This disturbed me since it was absolute proof Cooper had not done his homework and was not a responsible researcher.

The long list of material which disintegrates Cooper as someone of conscience has been previously sent (and it was condensed!) and I

would add only a 19-page interview by Martin Cannon of Robert Groden, recognized as a top authority on the photo evidence of the JFK assassination. This is important because in Cooper's book (Behold a Pale Horse) he says Groden has no photo credentials (whereas he, Cooper, has a degree in photography). I have cited a number of papers written by Groden in the extensive source list I am preparing to accompany my forthcoming book, Desese-majeste. I will make this documentation available to you in advance of publication if you wish. Such evidence of Cooper's non-association with the truth.

By the way, tell your copy editor that my spelling of PLAGIARISM was correct; that your spelling of PLAGERISM in my letter of last month was not. Also, I was FLAKINESS (not FLASHINESS) causing me to substitute Golden Age for New Age.

Cordially,

Ed DeMar
